

## ENTREPRENEURIAL DISCOVERY WORKSHOP FOR POTENTIAL SMART SPECIALIZATION DOMAIN: ENERGY

On June 18, 2019, the Ministry of Education, Culture and Research, in cooperation with the JRC, organized a workshop on the study of entrepreneurial potential in one of the priority areas -

Energy, which identified the main niches of intellectual specialization for this area, which will contribute to the effectiveness of the targeted research process for the needs of the national economy or regions. The Institute of Energy was directly involved in the preparation and carrying out of the event. As stated in the concept of intellectual specialization, the participants represented the business sector, government bodies, civil society and research institutes.

The Smart Specialization strategy will help Moldova to capitalize on its innovative potential by focusing resources on a limited number of intellectual growth priorities with competitive advantages.
